

MANGE 2

Properties list:

- logistic optimisation
- biodegradability and compostability
- other materials
- other shapes
- dispensing systems
- other food
- concept
- single product
- end-user packaging
- product accessibility
- edible packaging
- ready to use
- disposable packaging
- ironic
- unusual visual association
- identity by shape

This is a brilliant and playful idea from Brighton University graduate designer Sebastiano Oddi who developed this cooked edible food delivery lunch box. Mange2 is an edible picnic container for two people. By manipulating the gaseous structure of bread Oddi has designed a wholly edible container that results in near zero waste. It currently has been produced in 8 different flavours.
