

Nŉ9 CHOCOLATES

Properties list:

tactile packaging
information about use
product accessibility
end-user packaging
single product
concept
confectionery and sweetness
dispensing systems
other shapes
metals
cardboard and paper
eco-friendly
classic
metallic
corrugated
instruction through pictograms
identity by typography

The name of the product is a French rebus where the roman number IX creates the word NUT (NOIX). To develop the project, first a mould was designed in a nut shape. The package was then designed out of laminated layers of corrugated board, with a breakable metallic sheet that holds the chocolates in place.
