

À CO RESPONSABLE

Properties list:

- other shapes
- cardboard and paper
- minimal
- eco-friendly
- identity by colour
- corrugated
- identity by shape
- product accessibility
- logistic optimisation
- adults
- opening and closure systems
- end-user packaging
- concept
- single product
- electronics

This project was developed using just one sheet of cardboard: it resists to shock and it has a minimal impact on the environment. The negative aspect of the energy smart lamps is that they contain mercury and they become very toxic on disposal; the package suggests that there could be a money refund on each lamp so that distributor and manufacturer could get them back for proper disposal.
