

BURGOPAK 2GO RANGE

Properties list:

- product accessibility
- information accessibility
- end-user packaging
- update
- cardboard and paper
- folding carton
- opening and closure systems

Burgopak have created a range of packaging solutions utilizing their patented slider system to offer clients a collection of standard size packagings. The 2GO range is about removing the countless options offered previously and streamlining variables to a point that the range could cover almost all product categories: key factual information about each design, such as external dimensions, structural features and intended applications, are included on the front cover of every sample.
