

KARLSSON'S VODKA

Properties list:

- end-user packaging
- single product
- update
- labels and sleeves
- bottle
- contemporary
- unusual visual association
- unusual structural association
- transparent
- limited edition packaging
- identity by shape
- glass and ceramics
- alcohols and spirits
- identity by typography

From [Karlsson Vodka](http://www.karlssonsvodka.com) website: "The first KARLSSON'S VODKA bottle was manufactured at the Saint-Gobain factory in France where the traditions of the glass industry dates all the way back to the 18th century. The mirrors of Versailles were made here as well as the Louvre's modern pyramid. Today Saint-Gobain is the world's largest factory for fine glass production and the KARLSSON'S VODKA bottle is not an exception. The bottle was produced using sand exclusively from the Fontainebleau forest to ensure crystal clearness."
