Invitation

Properties list:

event packaging
logistic optimisation
end-user packaging
single product
new product
fruit and vegetables
other shapes
cardboard and paper
contemporary
unusual structural association
identity by colour

This invitation card has a double use as a little plate for corn. It was created for the annual Ì^épluchette de blé d?inde Ì^of the University of Quebec in Montreal by a professor, Patrick Evans and a ancient student Ariane Perpignani. Simple but efficient, the invitation was sent to the people with a note on it to bring the paper to reuse it at the party.
