ORIGAMI TAKE-OUT BOX

Properties list:

biodegradability and compostability
end-user packaging
new product
soups and ready-meals
delicatessen
folding carton
cardboard and paper
identity by shape

The design uses origami techniques to form an enclosed shape resembling a bud that opens into a full bloomed flower, has a self-locking mechanism that eliminates the need for adhesive, and has a bowl shaped base for easy grip and comfort when eating from it while standing or on the go.
The packaging is made from one piece of paperboard with no glue or plastic to make it easy to recycle.
